# Nandu Varma Ramineni

Dublin nanduramineni2233@gmail.com 0870393277 linkedin.com/in/nandu-ramineni www.nandu.work

## SUMMARY

Software Engineer with professional experience building scalable backend systems and distributed microservices. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, Software Design, Distributed Systems and Cloud Computing. Experienced with Java, TypeScript, JavaScript, Node.js, AWS, Docker, CI/CD, Redis, RabbitMQ and MongoDB. Passionate about building reliable distributed systems, solving complex engineering problems and delivering high-quality software in agile environments.

## EXPERIENCE

### Full-Stack Developer

**RedString** **August 2024 - January 2026**

- Designed and implemented distributed microservices using Node.js, React, MongoDB, Redis, and RabbitMQ to support scalable user workflows across web and service layers.
- Built low-latency real-time systems using Socket.io, reducing event processing latency by 45% and improving overall user engagement.
- Applied **object-oriented design principles** and clean coding practices to deliver production-quality services in a **Linux-based environment**.
- Improved service efficiency and infrastructure utilization, reducing server costs by **10%** through optimized service orchestration.

## SKILLS

Languages: Java, TypeScript, JavaScript
UI: ReactJs, Next.Js, Tailwind
Computer Science: Data Structures, Algorithms, Object-Oriented Programming, System Design, Distributed Systems, SDLC, Database Systems
Backend: Node.Js, Express, REST APIs, Microservices
Cloud & DevOps: AWS, Docker, Linux, Git, GitHub Actions, CI/CD
Databases: MongoDB, MySQL, Redis

## PROJECTS

### HireBid – Scalable Freelance Marketplace Platform

Self · github.com/Nandu-ramineni/HireBid-Freelance_A_MarketPlace.git · May 2025 - Present

- Architected a **high-throughput, distributed backend** using **Node.js, Express, MongoDB, Redis, and RabbitMQ**, improving system scalability by **40%**.
- Designed APIs and backend workflows handling **complex business logic**, including gig lifecycle management, payments, and subscriptions.
- Implemented **real-time messaging and notifications**, enabling instant cross-service updates and reducing communication delays by **85%**.
- Integrated secure payment processing and tiered memberships, improving conversion rates and supporting extensible digital purchase flows.
- Followed **agile development practices**, iterative delivery, and continuous improvement.

### Streaming Application

Self · github.com/Nandu-ramineni/Streaming-Application.git

- Achieved a 30% increase in video load speed using AWS CloudFront and optimized MongoDB queries.
- Implemented JWT-based secure user authentication, reducing unauthorized access attempts by 40%.
- Integrated Razorpay for efficient transaction processing, resulting in a 25% boost in successful subscription payments.

### Food order and Delivery Platform

self · yummz.netlify.app/

- Built a scalable food order and delivery platform using React, Redux, Node.js, and MongoDB, improving load performance by 35% and supporting 5,000+ monthly user sessions.
- Integrated Razorpay for secure payments and implemented JWT authentication, reducing payment failures by 20% and boosting user retention by 18%.
- Developed a user-friendly admin dashboard for order management, enabling efficient tracking and fulfillment of customer orders.
- Implemented a responsive UI/UX design with React, enhancing user navigation and order placement efficiency across devices.

## EDUCATION

### MSc in Computing - Artificial Intelligence

Dublin City University · Dublin · 2025-2026

### Bachelor of Technology in Computer science and Engineering

Parul University · Vadodara,Gujarat, India · 2021-2025 · 7.94
